

Live healthy. Breathe Happi.

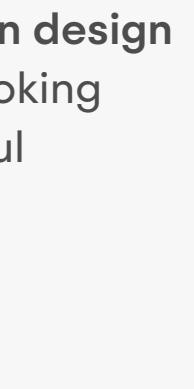

Air purification you can see

[Shop Now](#)

Why Happi?

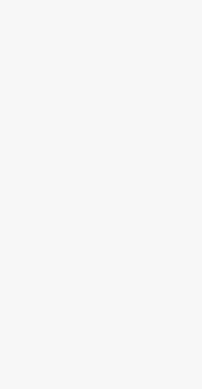

See the clean
Happi's easy-to-read
display shows your air
quality improving in real
time. Breathe easy
knowing it's filtering what
you expect — and maybe
some things you don't.

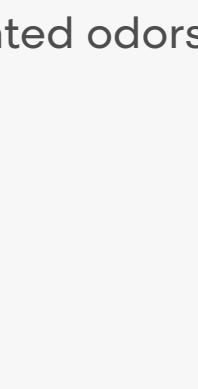

Turn on, Turn out
Happi is the most
eco-friendly product of
its kind, saving energy by
working only when it
needs to, and using only
as much as an LED lamp.

Quality Guaranteed
By owning the factory
where Happi is produced,
we're able to ensure
impeccable quality from
beginning to end, making
customer satisfaction a
breeze.

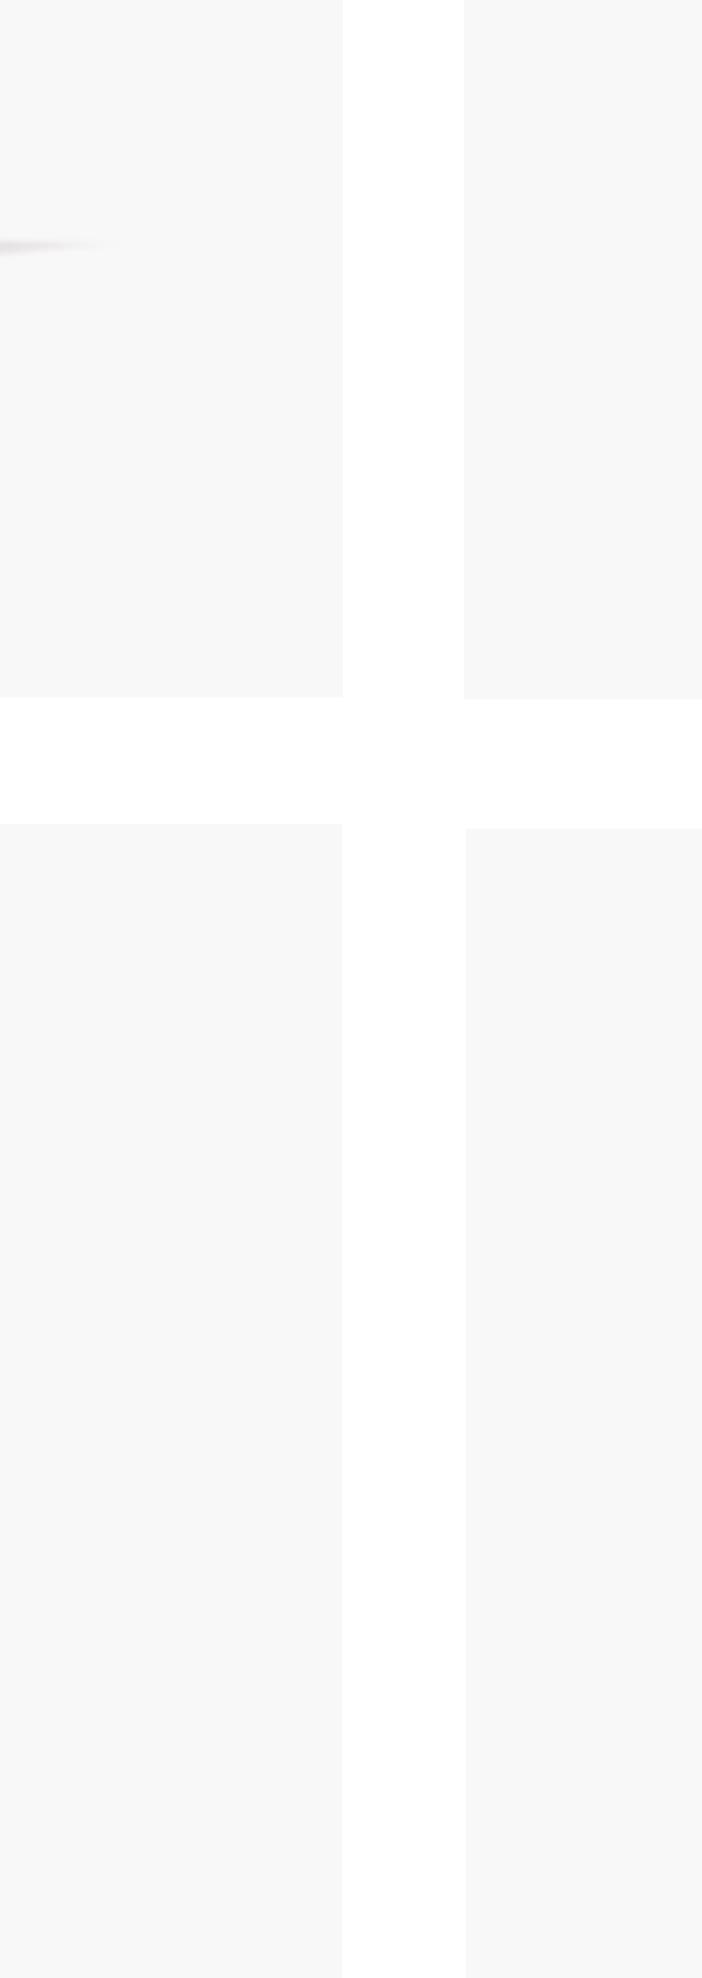

Hassle-Free Filters
Our automatic filter
replacement program
means Happi is one less
thing for you to worry
about.

45-Day Risk-Free Trial
We give you 45 days to try
Happi — we want you to
have plenty of time to
decide you love it.

Technology

High-efficiency UV light kills
even the smallest bacteria

Dynamic display reads the
room and updates in real
time, keeping you protected

Streamlined control panel
makes clean air less
complicated

Understated, modern design
keeps your space looking
(and feeling) beautiful

5-layer filter captures
particles, gases, and
unwanted odors

**Happi KJ500 - Our Happi**

\$398 USD

About

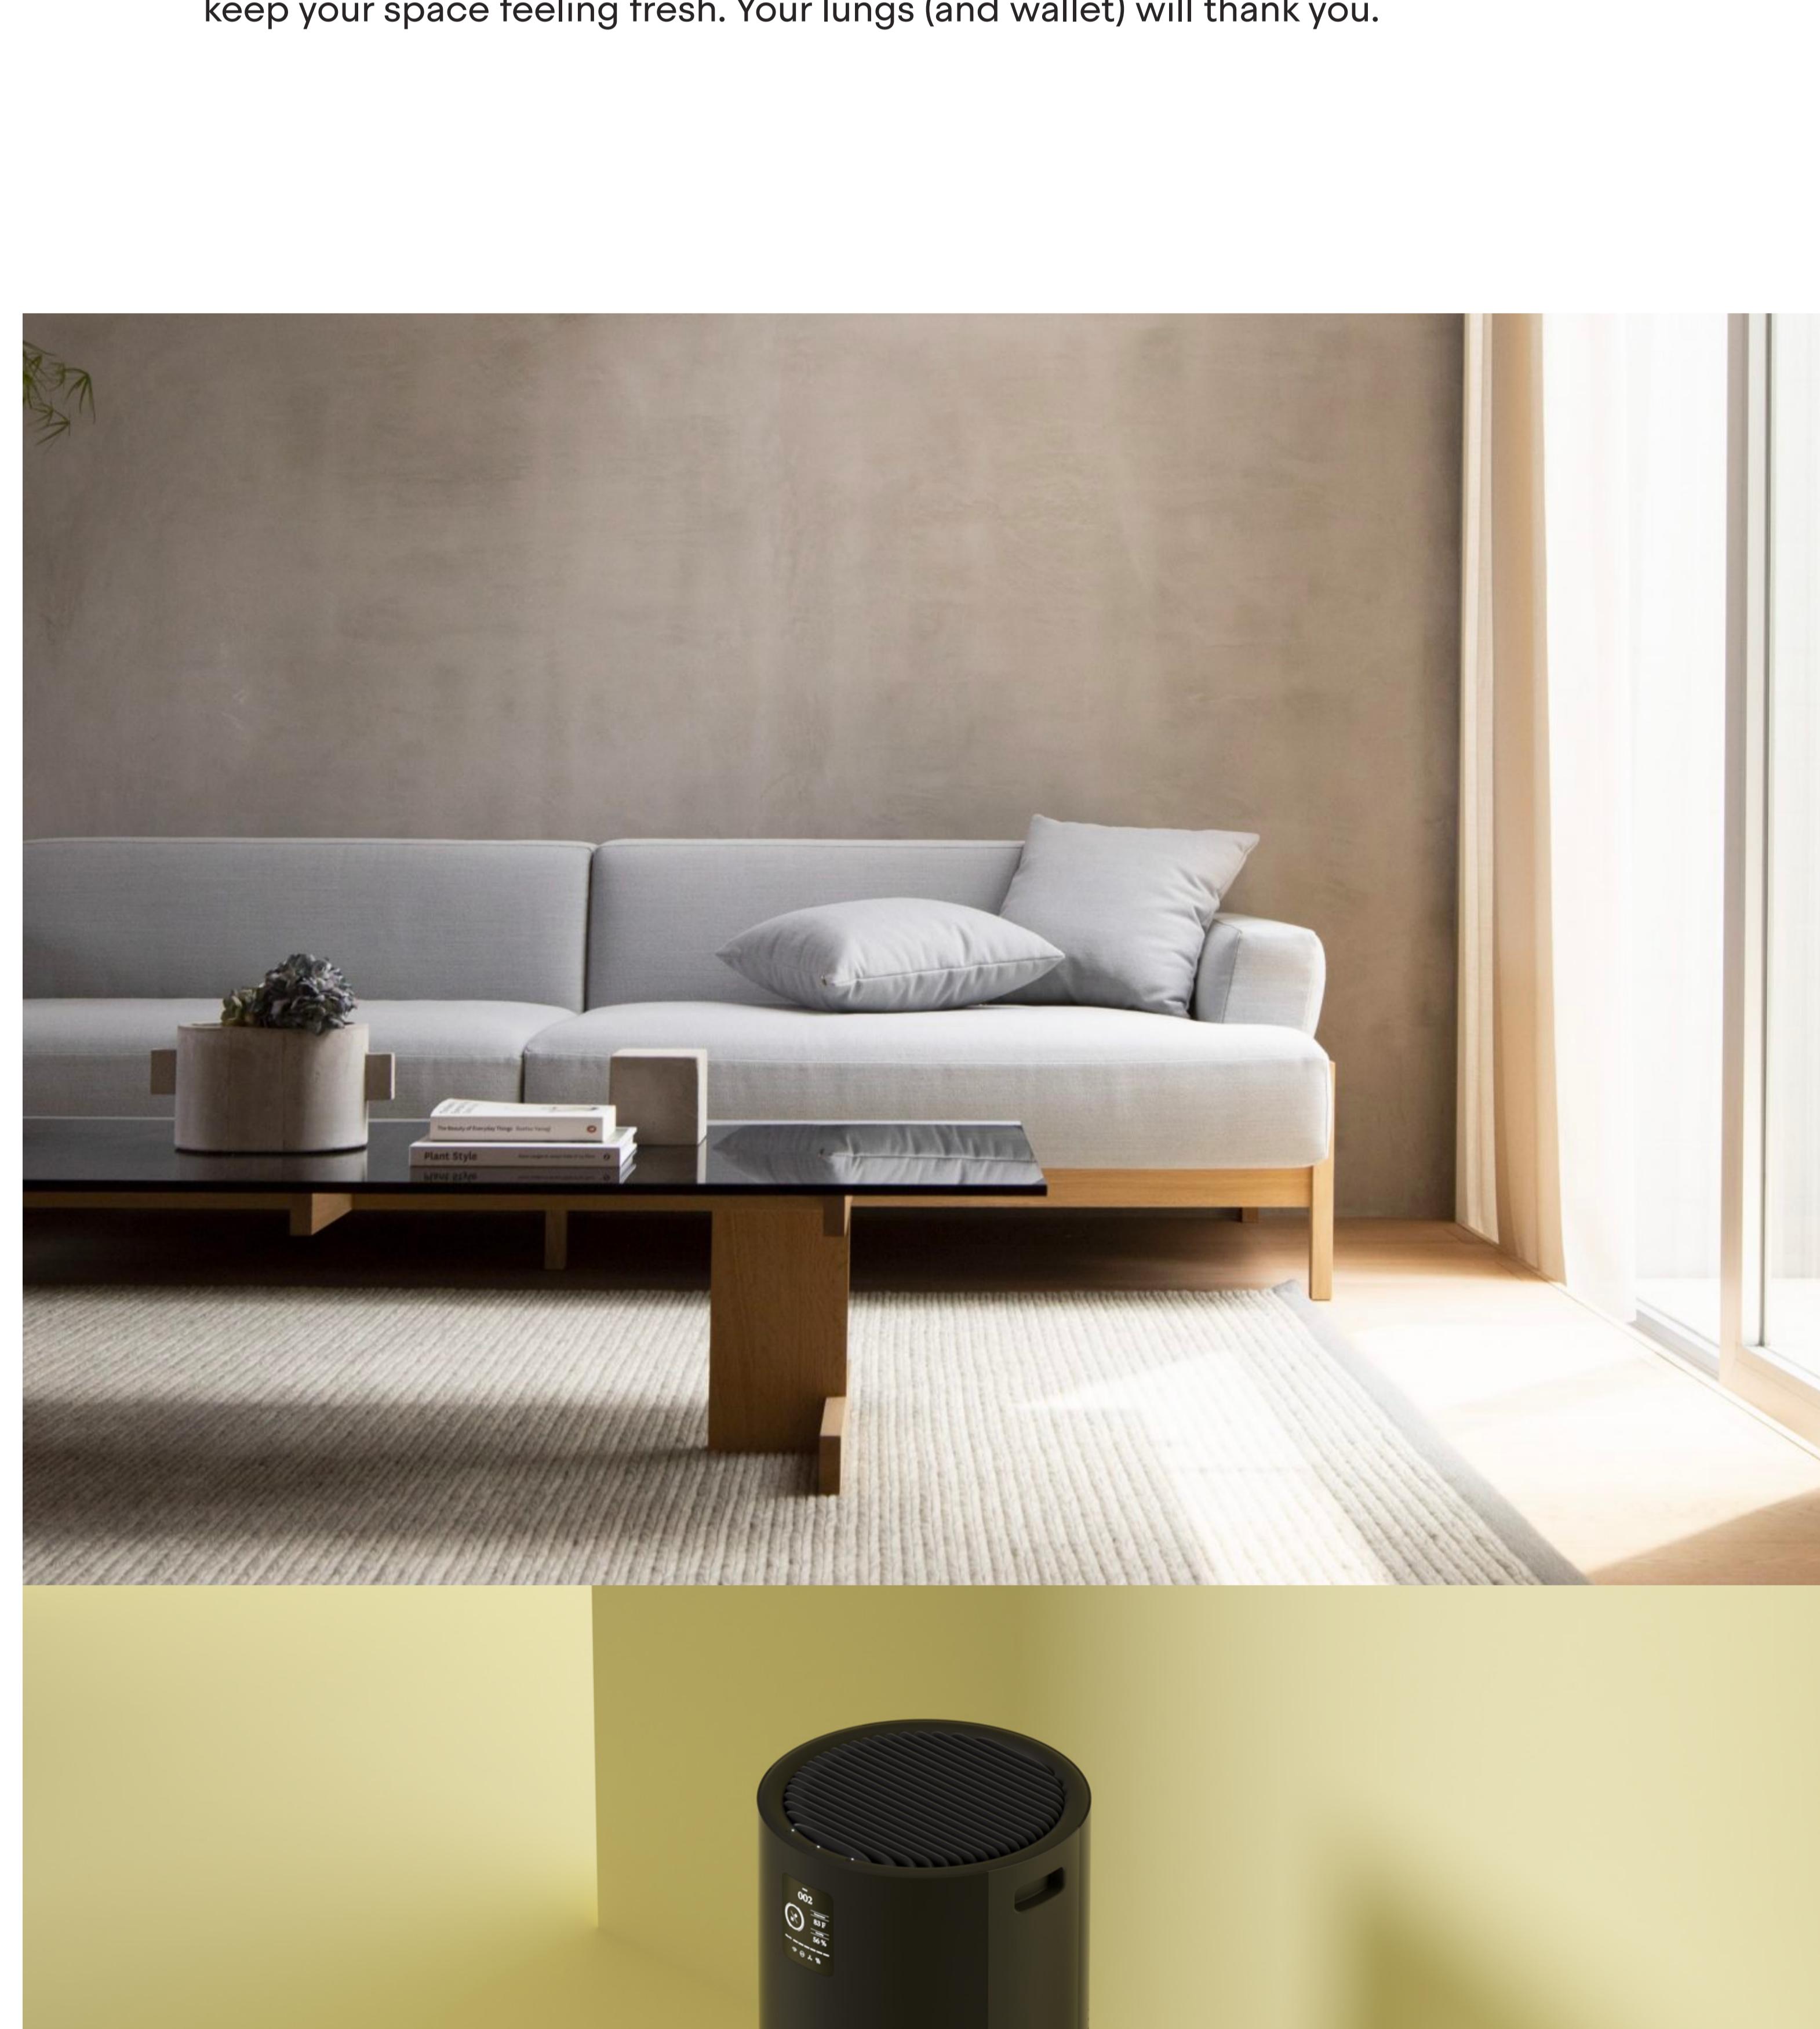

Dream big (and clean). Our Happi is the elegant solution to your XL fresh air needs, standing guard while the kids play, the adults do yoga, and the cat plots your downfall. Its bright, crisp LED screen tracks temperature, humidity, and air quality for a comprehensive look at what's going on in your space — cat's evil plan not included.

+ Where to use it

Our fresh devices are clean, modern, and effortlessly beautiful, slipping right into your space ready to purify, cleanse, and disinfect your sanctuary.

**For every style**

We all deserve clean air. You know, the kind that makes you smile when it fills your lungs. With Happi, you won't just feel the clean, you'll see it — we're putting an end to expensive guessing games. Simple, beautiful, and effective, Happi promises to keep your space feeling fresh. Your lungs (and wallet) will thank you.

Everyone deserves to
breathe fresh, unpolluted air
that revitalises every cell

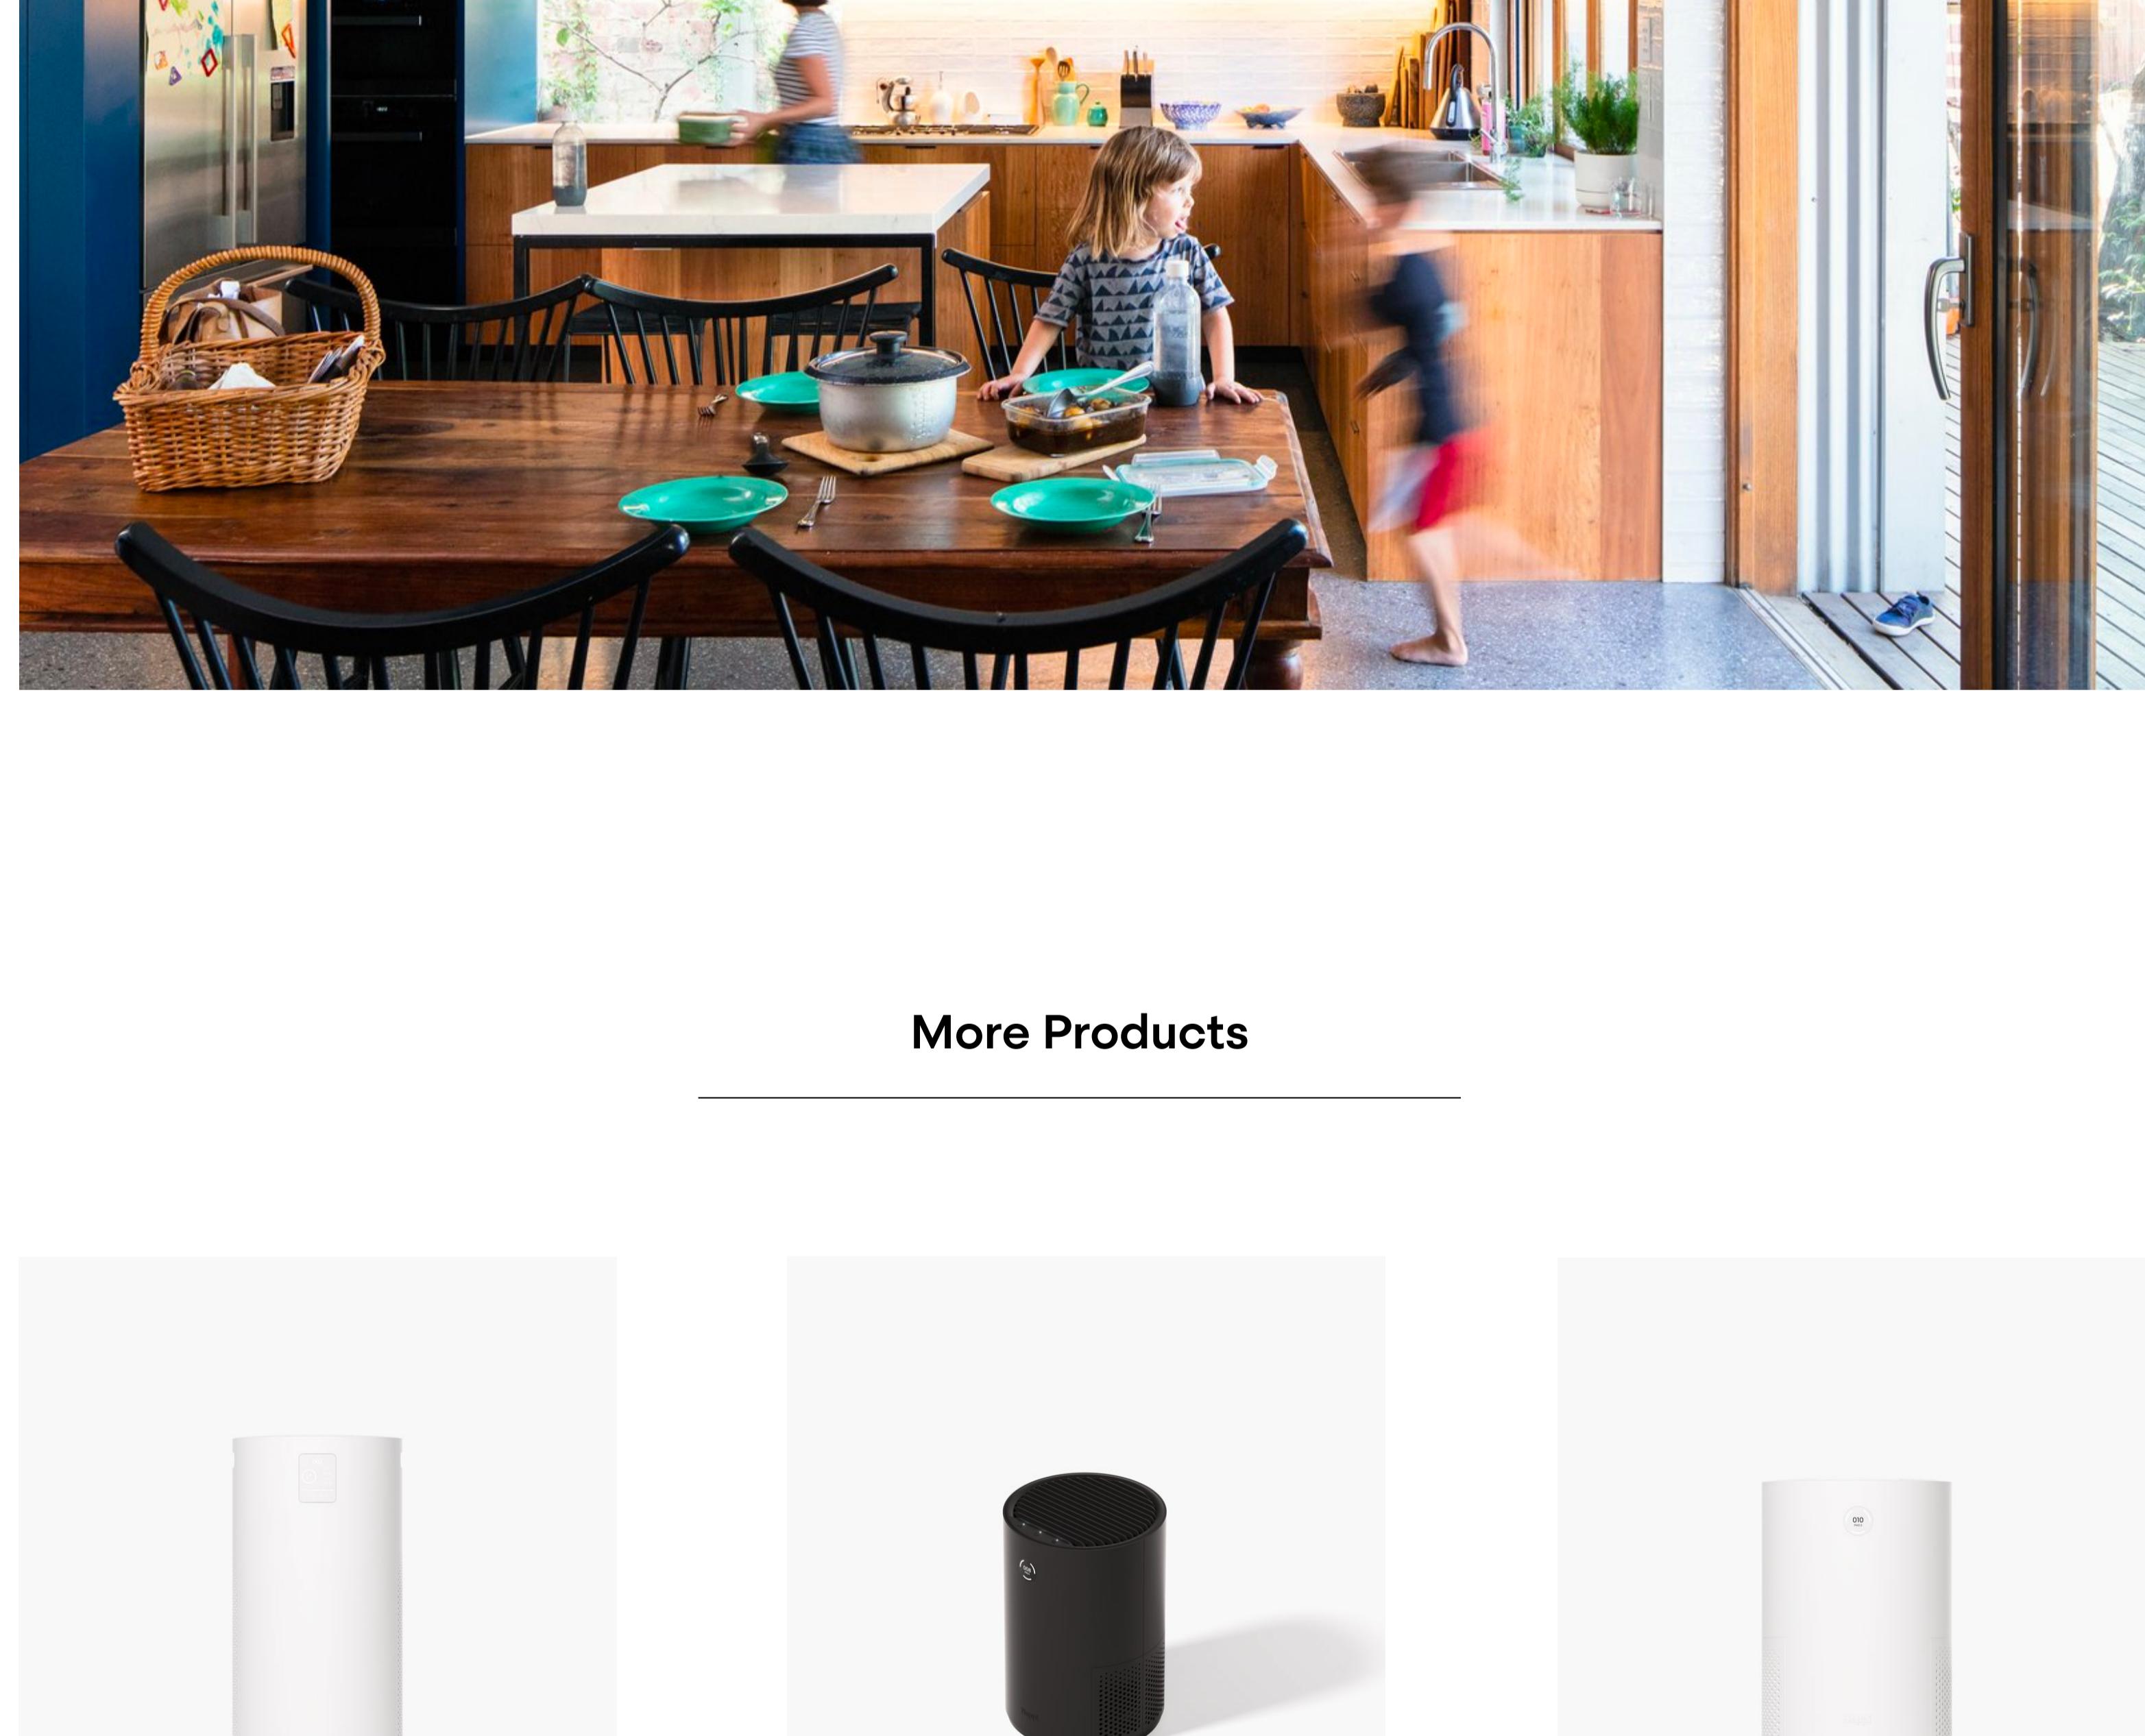

About Happi

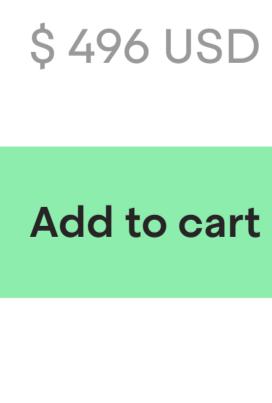

At Happi, we want a safer, cleaner planet. The kind we all deserve — not just in our homes, but around the world.

We're doing our part by protecting your space, and we're doing it more transparently and efficiently than any other air purifier on the market. All you have to do is sit back, relax, and watch Happi do the work, while energy-saving auto mode ensures you're doing the most good.

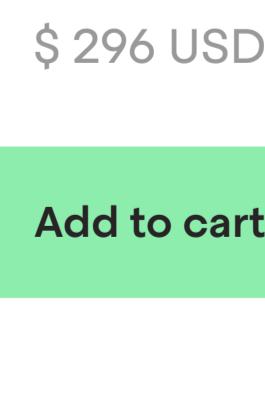

And for every Happi you purchase, we plant a tree in a developing country, helping to reduce the harmful effects of CO₂ emissions on a global scale. Happi doesn't just help you breathe easier — it helps us all.

Everyone deserves to breathe fresh, unpolluted air that revitalises every cell

Happi isn't the first air purifier, but we believe it's the best. Our team spent countless hours designing and engineering the most affordable, efficient device on the market. They meticulously refined every detail, right down to the screws. But don't just take our word for it — see for yourself, right there on the smart display screen. At Happi, quality and honesty go hand in hand.

How Happi works?

5 layers of protection

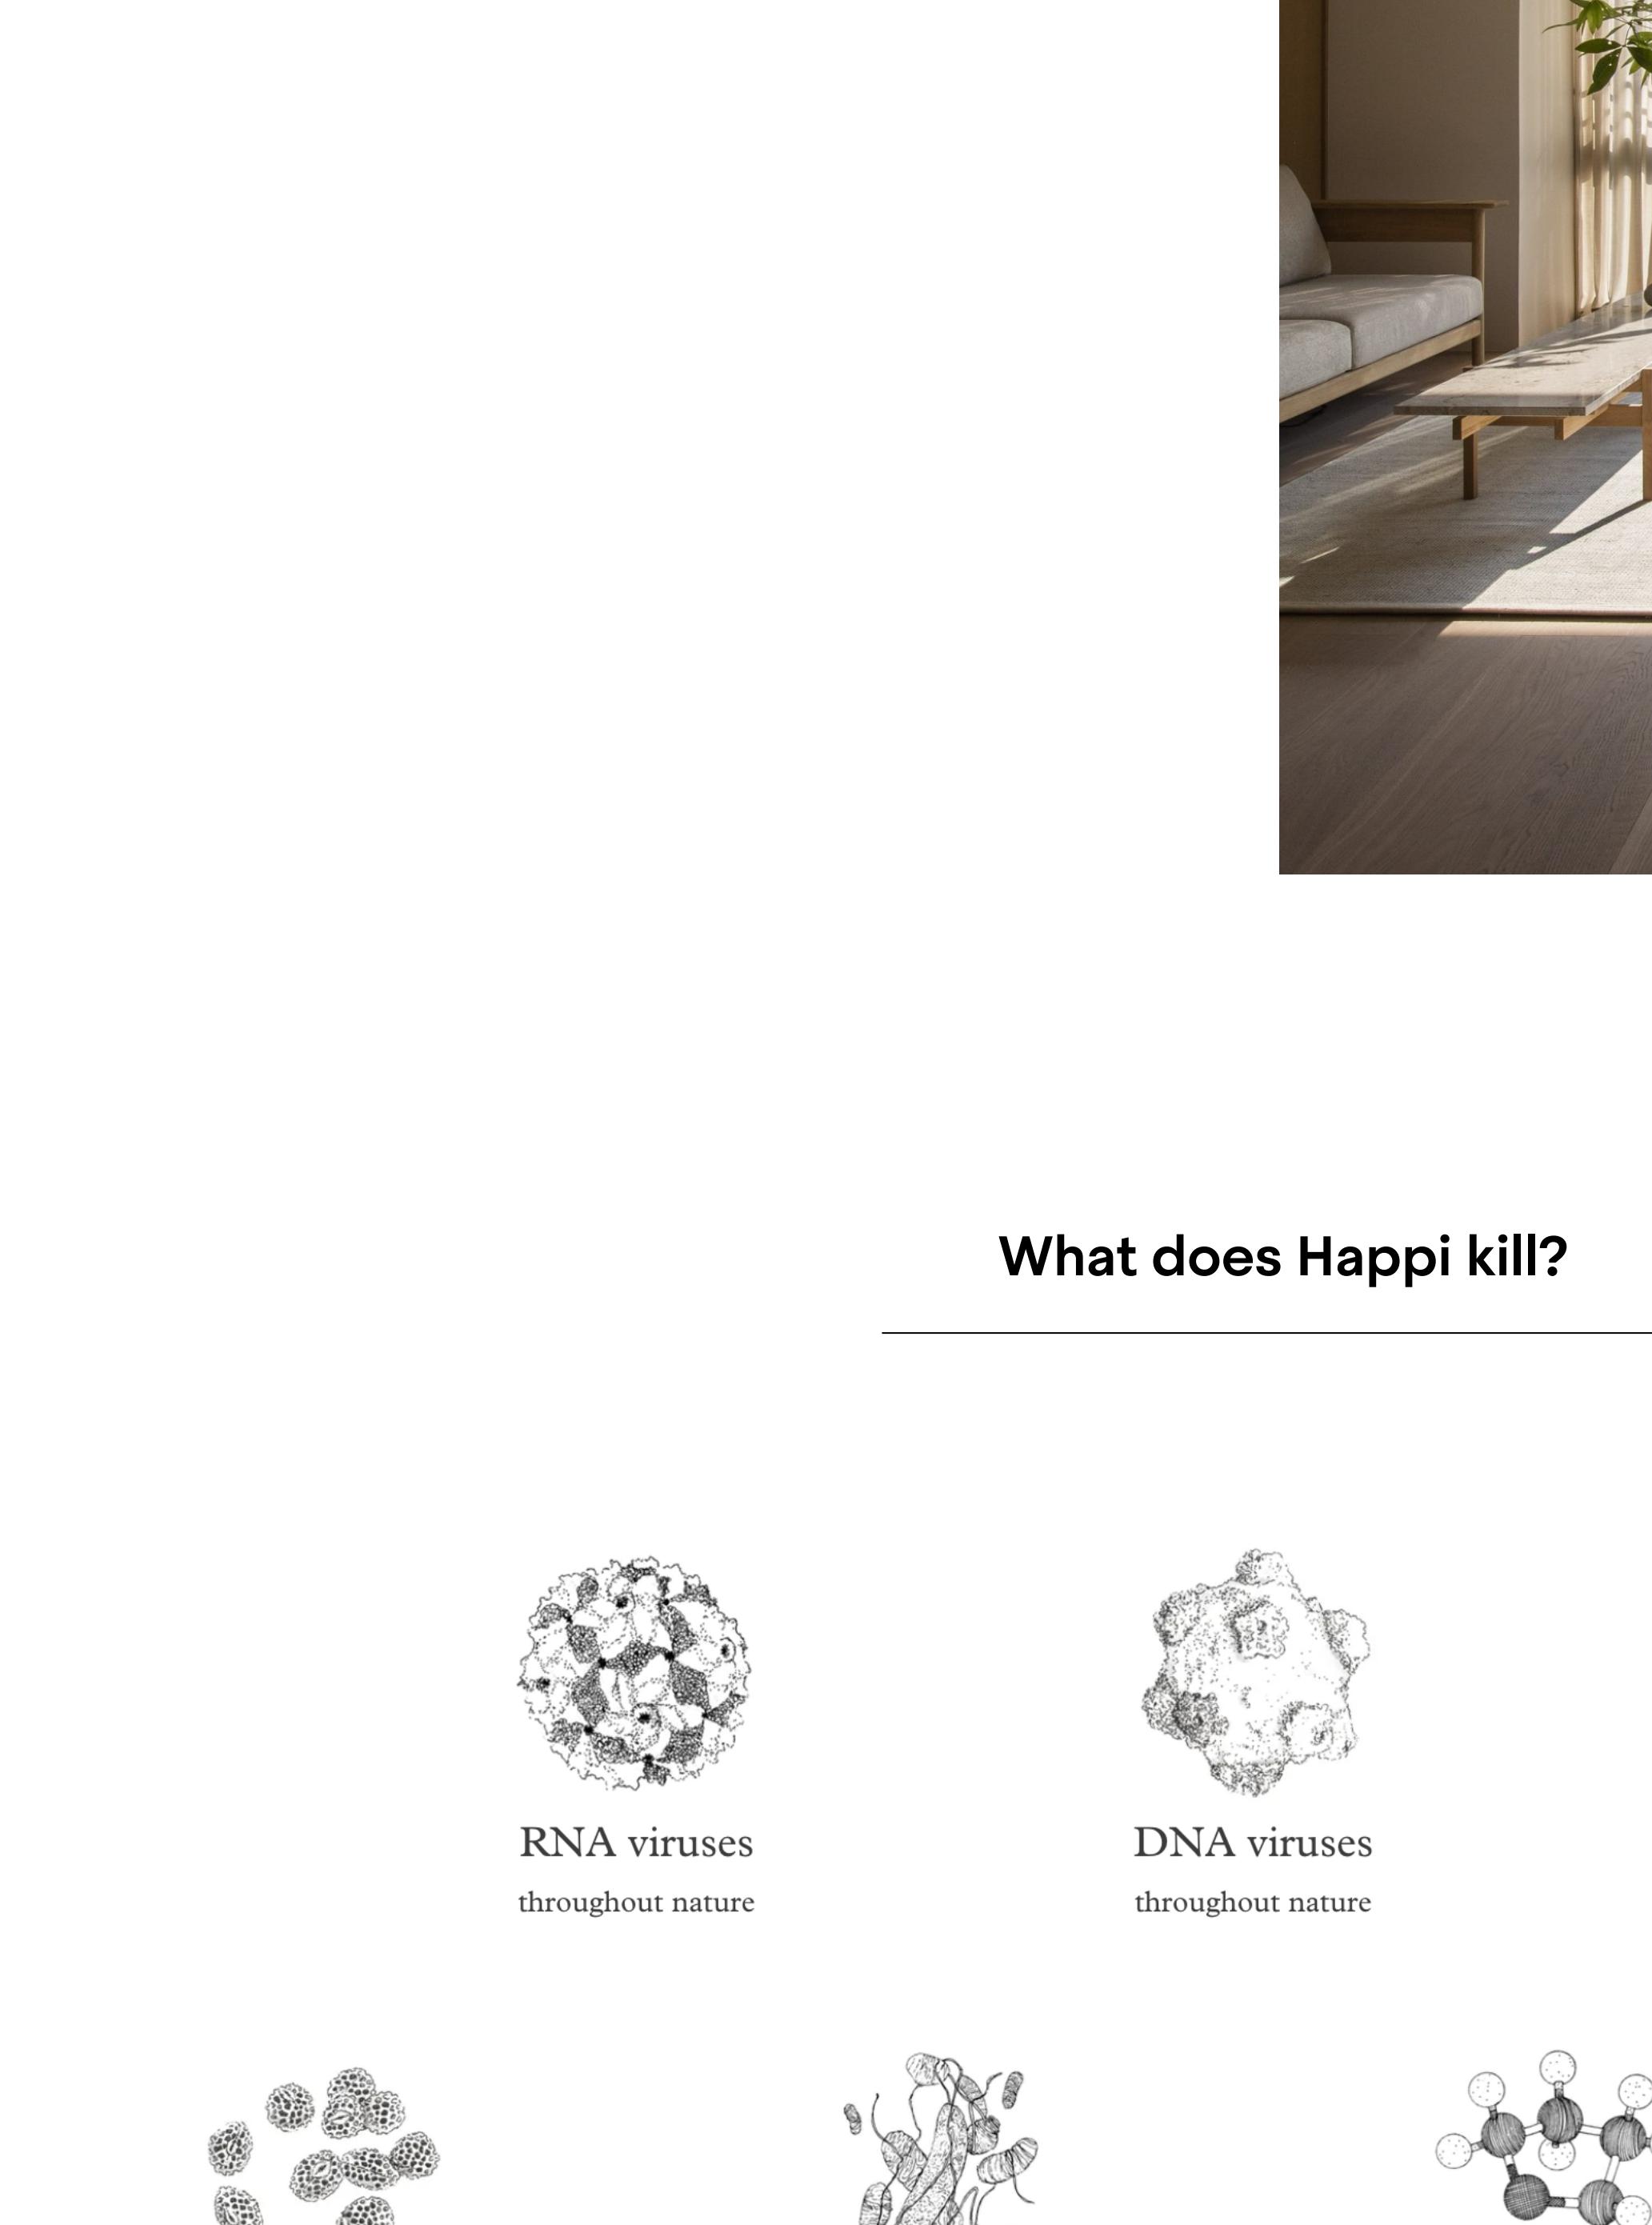

The bad stuff goes in here: our 5-layer filter destroys 99.97% of particles, gases, unwanted odors, and so much more.

By using a small filter with high air volume, Happi is able to cycle air more frequently, guaranteeing a thorough clean.

5 unique layers work together to protect you and your space:

Initial effect filter

Bucket-shaped structure intercepts dust, hair, dander, and other large particles

Quick Facts

1

Quiet and quick.
Happi cleans your air before you even realize it's dirty, thanks to turbine increase technology. But more speed doesn't mean more sound — at just 27 decibels, you can catch some ZZZs without sacrificing that fresh feeling

2

Ozone free.
When we say "breathe easy," we mean it. Happi leaves nothing harmful behind as it cleans.

3

Zero tolerance policy.
Happi stops microscopic particles, gases, smoke, odors, and bacteria in their tracks.

4

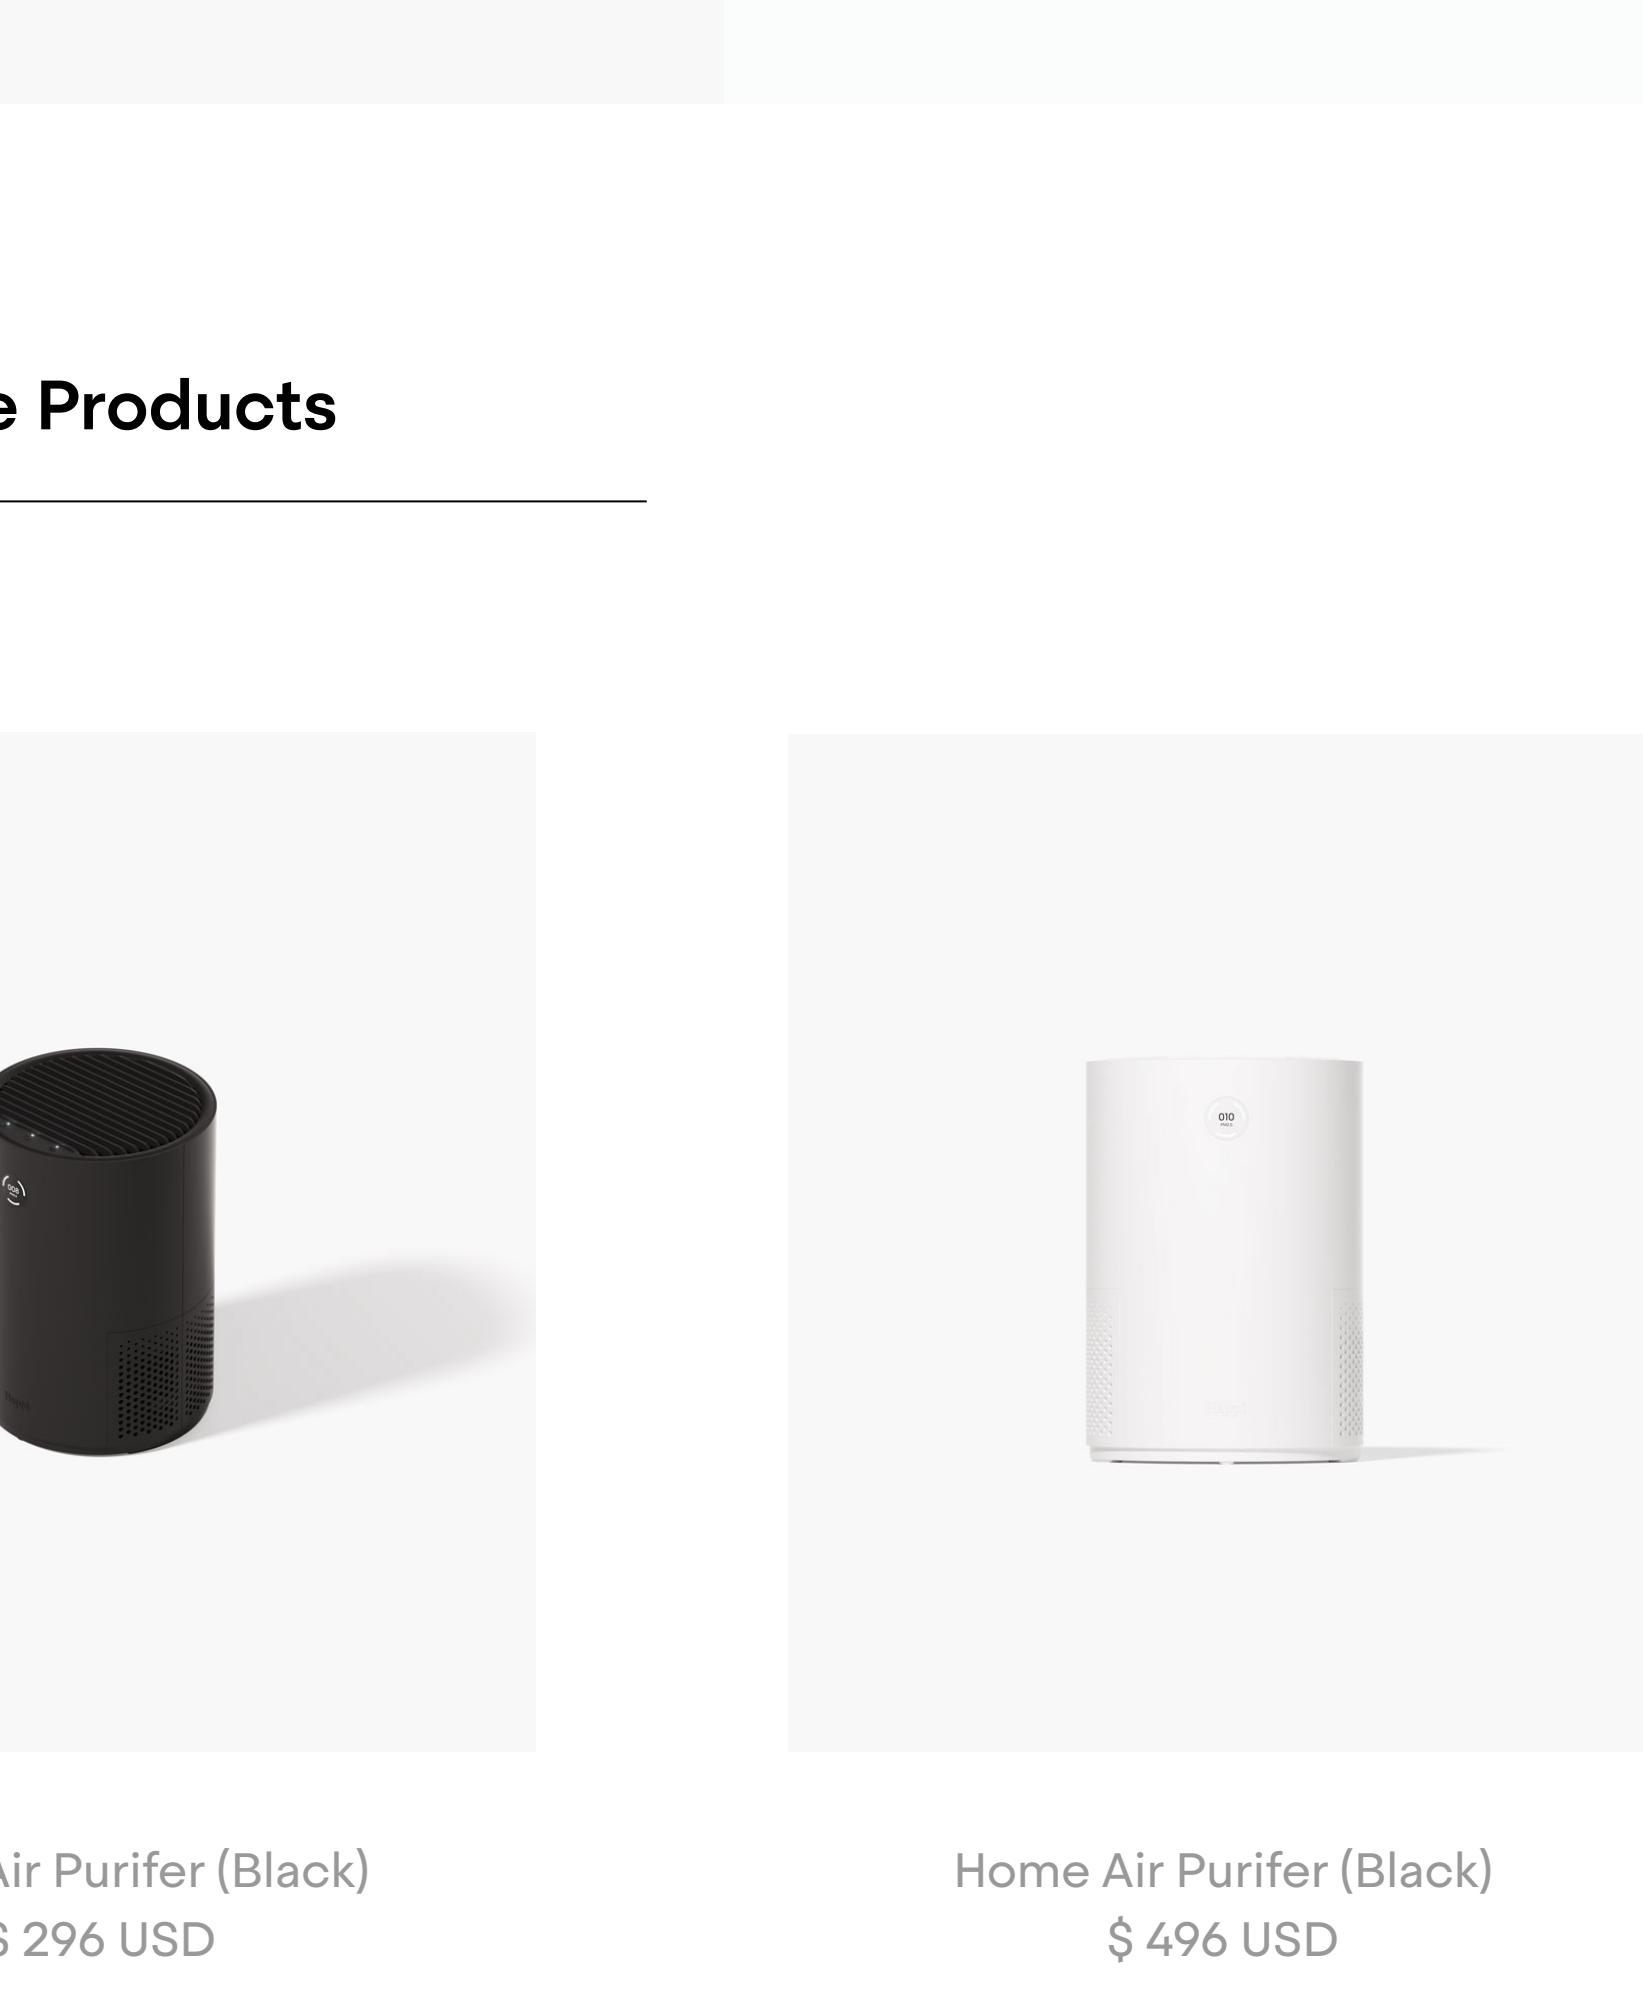

Total coverage.
Wherever you need it, Happi works. Bedrooms, bathrooms, offices, kitchens, sheds, doghouses — even that room where you keep all your gym stuff. You know the one.

5

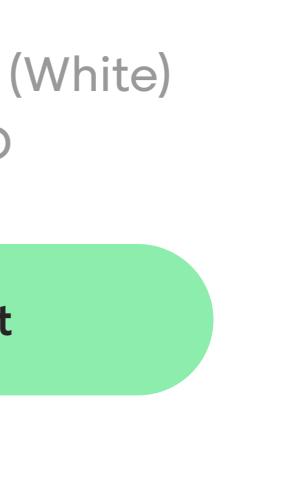

UV lamp.
The Robin to our filter's Batman. This ultraviolet light sterilizes your space, wiping out secondary pollutants and bacteria with 99% efficiency.

For every space

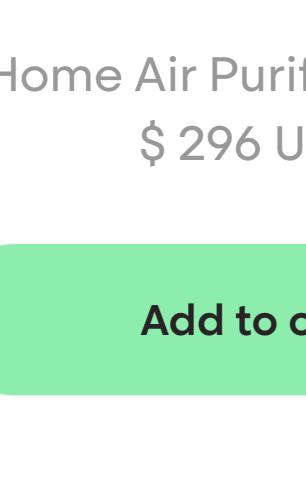

We all deserve clean air. You know, the kind that makes you smile when it fills your lungs. With Happi, you won't just feel the clean, you'll see it — we're putting an end to expensive guessing games. Simple, beautiful, and effective, Happi promises to keep your space feeling fresh. Your lungs (and wallet) will thank you.

What does Happi kill?

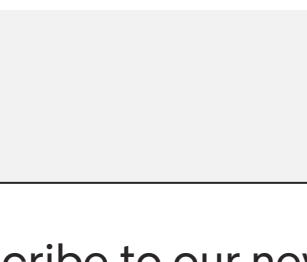

RNA viruses
throughout nature

DNA viruses
throughout nature

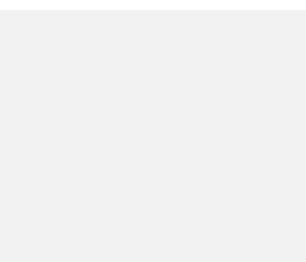

Black mold
window frames, inside pillows

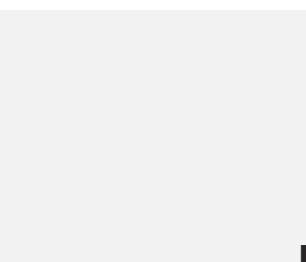

Pollen
windows, doors, carpets

Bacterial spores
spoiled food, bathrooms, kitchens

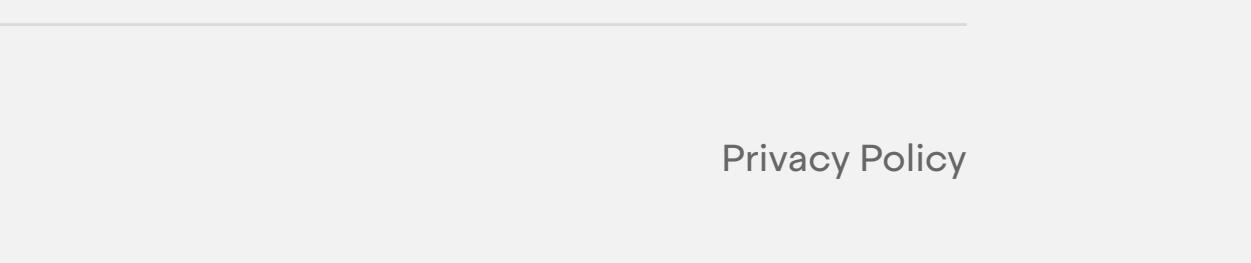

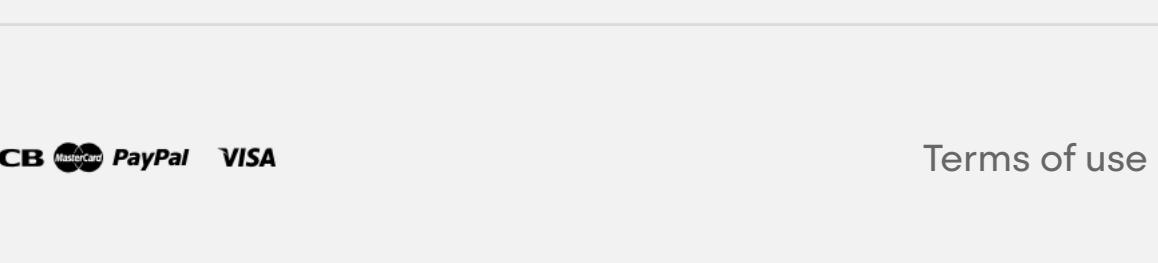

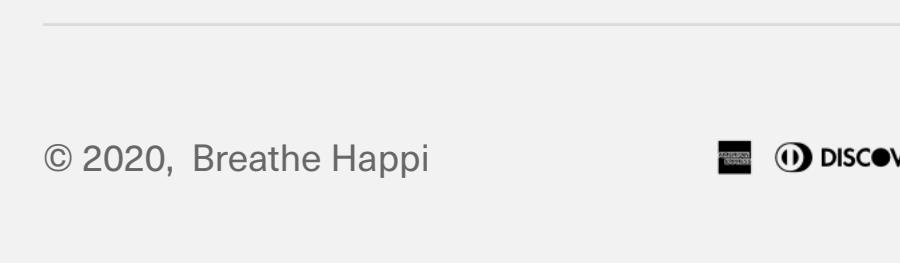

Burnt food smell
(Furan)

Citrus-scented cleaners
(D-Limonene)
